

Keshri Nandan Tiwari

Software Developer

Jabalpur, Madhya Pradesh, India | +91-6266819409 | keshrinandantiwari08@gmail.com | [linkedin](#) | [github](#) | [portfolio](#)

PROFESSIONAL SUMMARY

B.Tech Computer Science Engineering graduate and full-stack software developer with hands-on experience designing and building production-ready web applications using Java, Spring Boot, React.js, and PostgreSQL. Skilled in developing RESTful APIs, microservices architecture, relational database design, and containerized deployments on Kubernetes. Experienced in cross-functional, Agile team collaboration, delivering clean, scalable, and maintainable code across the full software development lifecycle (SDLC).

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), C, SQL, HTML5, CSS3
Backend: Spring Boot, Spring MVC, Spring Security, RESTful API Development, Microservices Architecture, JSON Web Token (JWT), JUnit
Frontend: React.js, Redux, Vite, Tailwind CSS, Bootstrap, Responsive UI Design
Databases: MySQL, PostgreSQL, Hibernate, Database Design, Query Optimization
DevOps & Cloud: Docker, Kubernetes, AWS (EC2, S3), Heroku, Vercel, Netlify, CI/CD Pipelines, GitHub Actions
Developer Tools & Platforms: Git, GitHub, Version Control, Maven, Postman, Swagger, IntelliJ IDEA, VS Code, Notion, Android Studio
Core Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), System Design, Unit Testing
AI & Productivity Tools: ChatGPT, Google Gemini, GitHub Copilot, Vibe Coding, AI-assisted development workflows
Methodologies & Analytics: Agile, Scrum, Data Analysis, MS Excel, Power BI

SOFT SKILLS

- Team Leadership & Collaboration — Led frontend architecture decisions for a cross-functional team delivering EDU360 across 5 user roles
- Problem-Solving — Diagnosed and resolved a database performance bottleneck, achieving a 40% improvement in query speed
- Self-Motivated Learner — Independently built 2 full-stack, production-style applications spanning the complete software development lifecycle
- Communication — Clearly conveyed technical designs and API contracts to cross-functional teammates, aligning frontend and backend work throughout EDU360
- Adaptability — Adopted AI-assisted development workflows (GitHub Copilot, Gemini) and DevOps tools (Docker, Kubernetes) without formal training

PROJECTS

EDU360 — School Management Platform | Frontend Developer (Team Project) Jan 2026 – Present

Tools: React.js, Vite, JavaScript (ES6+), Redux, Tailwind CSS, REST API Development and Integration, Git — Currently live and in active development

- 40% faster feature delivery — Architected a reusable React.js component library with role-based dashboard layouts for 5 user roles, following Agile/Scrum workflows and a structured Git branching strategy.
- Zero integration failures across 5 backend modules — Developed and integrated REST APIs with a Spring Boot backend covering Authentication, Admissions, Academics, Attendance, and Exams, secured with JSON Web Token (JWT) access control.
- Enhanced user engagement across the platform — Engineered a custom visual effects suite using advanced JavaScript (ES6+), applying system design principles to separate concerns across components.
- Production-ready code quality — Implemented a structured Git workflow with feature branching, pull requests, and code reviews within a cross-functional team environment.

Hospital Management System | Personal Project Mar 2025 – Oct 2025

Tools: Java, Spring Boot, MySQL, Swing/JavaFX, REST API Development, JWT Authentication, JUnit

- 40% improvement in query response time — Designed a normalized relational MySQL schema with foreign-key constraints and optimized indexes, applying system design principles for clean, layered architecture.
- 100% role-based access control — Developed end-to-end REST API endpoints with JWT authentication across Admin, Doctor, and Receptionist roles, with full audit logging for compliance.
- 60% reduction in data-entry errors — Built automated validation logic across the Swing/JavaFX desktop UI, with JUnit-tested service layers and unit-tested CRUD operations.
- Production-grade API reliability — Postman-tested endpoints covering all CRUD operations, following structured Git workflow and version control best practices throughout the full SDLC.

EDUCATION

• Gyan Ganga College of Technology, Jabalpur	Jabalpur, Madhya Pradesh
Bachelor of Technology in Computer Science Engineering	Sep 2022 – Jun 2026
• Govt. Excellence Higher Secondary School, Maihar	Dist. Satna, M.P.
Higher Secondary (XII) — Madhya Pradesh Board (MPBSE)	Jul 2021 – Mar 2022
• Gandhi Higher Secondary School, Maihar	Dist. Satna, M.P.
Secondary (X) — Madhya Pradesh Board (MPBSE)	Jul 2019 – Mar 2020

CERTIFICATIONS

- Java Full Stack Developer — EduSkills / AICTE — Spring Boot, React.js, REST APIs, MySQL, deployment workflows
- Java Programming — Cisco Networking Academy — Core Java, Object-Oriented Programming (OOP), data structures, exception handling
- C Programming — Cisco Networking Academy — Memory management, pointers, algorithms, problem solving

COURSEWORK

Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Web Technologies

INTERESTS

Traveling, Food, Cricket, Teaching, Self-improvement
